Dynamic Barriers

Problem

Some rockfall in the last years to the road close to Hittisau, endangering the road safety.

Solution

The investor WLV Bregenz designed and tendered a rockfall protection measure with rockfall protection barriers with a minimum energy capacity of 500 KJ in CC3 class in 5 lines.

Maccaferri awarded the project and delivered the barrier RB 750 that overperforms the client requirement of 50%, providing an energy capacity of 750 KJ.

Client: WLV, Bregenz

Designer / Consultant: WLV, Bregenz

Contractor: WLV, Bregenz

Products used (Qty.)

- Dynamic barrier RB 750 350 m1 in 5 lines

Date of construction: 09/2018 - 10/2018
